Collierville, TN 38017

Re: Pretreatment Technical Assistance Visit
 Collierville Sewage Treatment Plant
 NPDES Permit No. TN0057461
 Shelby County

Dear Mr. Harrison:

On Thursday, March 30, 2017, Mr. Eddy Bouzeid with the Division of Water Resources, Memphis Environmental Field Office (DWR/MEFO) conducted a Pretreatment Technical Assistance Visit (TAV) of the Collierville Publicly Owned Treatment Works. The purpose of a TAV is to review the status of the Town's pretreatment program. A TAV also provides an opportunity to answer questions that you might have or discuss any problems that the Town may be experiencing.

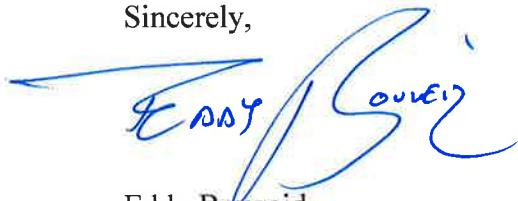

The TAV of Collierville's pretreatment program produced the following comments:

1. The Collierville pretreatment program includes six Industrial Users (IUs). Two (2) are Significant Industrial Users (SIUs) and four (4) Non-Significant Industrial Users. The two (2) SIUs are Carrier Corporation Metal Finishing and Carrier Corporation Water Remediation Plant. The four (4) NSIUs are McGinnis Oil (UST Remediation), Floratine Products (Custom Blend Fertilizer), and two (2) Carrier Corporation remediation sites.
2. Collierville, the Control Authority (CA), sampled and inspected all six (6) IUs during the evaluation period from April 2016 through March 2017.

3. The Semi-Annual Report (SAR) for the period from April 2016 through September 2016 was submitted on October 11, 2016. The SAR for the period from October 2016 through March 2017 has not been submitted as of the date of the inspection. The CA has until April 31, 2017, to submit the report.
4. The Legal Authority, the Sewer Use Ordinance (SUO) and the Enforcement Response Plan (ERP), and the revised Local Limits were approved by the DWR in Nashville on October 21, 2016. Subsequently, the CA placed the SUO and the ERP on Public Notice and received no comments. Proof of the Public Notice was submitted to Nashville and the Division had no objections. At the time of the TAV, the SUO and the ERP were given to the Mayor and the Board of Alderman for approval and adoption.
5. All the IUs were in compliance with their pretreatment discharge permits for the evaluation period from April 2016 through March 2017 except for Floratine Products. Floratine Products, a NSIU, had four (4) Zinc violations. The CA issued Notices of Violations for all violations and the IU submitted corrective action plans. The CA believes that once the Local Limits are approved and adopted, the Zinc concern will not be a problem since the Zinc concentration limit will change from 3.0 mg/l to 38.89 mg/l. The IU's Zinc exceedances ranged from 3.2-5.21 mg/l.
6. The biosolids from the CA's Wastewater Treatment Plants are hauled to a local landfill for land disposal.

The Division appreciates Mr. Harrison's cooperation and assistance during the inspection, and the Town's continuous efforts in complying with its pretreatment regulations. If you have any questions or comments, please contact me at eddy.bouzeid@tn.gov or 901-371-3023.

Sincerely,

Eddy Bouzeid
Environmental Protection Specialist
Division of Water Resources

TECHNICAL ASSISTANCE VISIT EVALUATION COMMENTS

CA has six (6) Industrial Users (IUs). Two (2) are Significant Industrial Users (SIUs) and four (4) are Non-Significant Industrial Users (NSIUs).
The two (2) SIUs are:
1. Carrier Corporation (metal finishing)
2. Carrier Corporation (water remediation plant)
The four (4) NSIUs are:
1. McGinnis oil (underground storage tank remediation site)
2. Floratine Products (custom blend fertilizer)
3. Carrier Corporation (groundwater remediation site-1)
4. Carrier Corporation (groundwater remediation site-2)
The CA sampled and inspected all six (6) IUs as required during the evaluation period.
The Semi-Annual Report (SAR) required for the evaluation period April 2016 through September 2016 was submitted in October 11, 2016.
The SAR required for the evaluation period from October 2016 through March 2017 has not been submitted. The CA has until April 30, 2017 to submit the report. According to Mr. Harrison, the report will be submitted before the required deadline.
All the IUs were in compliance with their discharge permits for the evaluation period except for Floratine. Floratine had four Zinc violations during the reporting period from April 2016 through March 2017. Four notices of violations were issued. The IU submitted corrective action plans and the plans were approved. The CA believes that once the approved local limits are adopted, the Zinc concern will not be a problem for the IU. The Zinc concentration limit will change from 3.0 mg/l to 38.89 mg/l. Floratine Zinc violations ranged from 3.2 to 5.31 mg/l.
The SUO, the Enforcement Response Plan (ERP) and the revised Local Limits were approved by Nashville. The SUO and the ERP were placed on public notice and received no comments. Proof of the public notice was submitted to Nashville and the Division had no objections. The SUO and the ERP were given to the Mayor and the Board of Alderman for approval and adoption.
All discharge permits will be reissued once the SUO and local limits are adopted.
The biosolids from the CA's WWTPs are hauled to a local landfill for land disposal.
